United States Import Tax Guide

Import Duties

$$Y \times X\% = \text{Import Duty}$$

Y = Customs Value, X = Duty Rate (%)

Tariff Rates

In the US, tariffs are harmonized. This means that the same duty rates apply in all US states when importing from foreign countries. Each product is classified according to a 6-digit HS code, which combined with the origin of the country, determines the applicable duty rate.

Important: Additional tariffs apply to products imported from China ([Link](#))

Import Duties

$$Y \times X\% = \text{Import Duty}$$

Y = Customs Value, X = Duty Rate (%)

Tariff Rates

Imported products are subject to duties. The duty rate depends on the product, and its origin - and is normally a percentage. The Customs Duties are calculated based on the Customs Value (CVAL).

Search Rates: CURRENT TARIFF CLASSIFICATION ([Link](#))

Customs Valuation (CVAL)

$$\text{Customs Value} = \text{Product Cost}$$

The Customs value (CVAL) in Australia is based on the FOB (Free on Board) price. This includes the following:

- Unit price
- Transportation to the Port of Loading (Included in FOB)
- Export Clearance Cost (Included in FOB)

Additional Costs

Additional costs (also called 'assists') may also include the following:

- Tooling costs
- Paid product samples
- Paid services (i.e., design services paid to the supplier)
